PROFESSIONAL SUMMARY

Software Developer with 4+ years of experience building full-stack applications and distributed backend services using Java, Spring Boot, Python, React, and Node.js. Experienced in API design, PostgreSQL, Redis, Kafka, automated testing, CI/CD, Kubernetes, and production AI-search integration.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, Go, SQL
Frameworks: React, Redux, Spring Boot, Spring MVC, Spring Security, FastAPI, Pydantic, Node.js, Express.js
Data & APIs: PostgreSQL, Redis, Kafka, REST, GraphQL, Spring Data JPA, Hibernate
Cloud & DevOps: Azure, AKS, Docker, Kubernetes, Jenkins, GitHub Actions, Git, CI/CD
Testing & Tools: JUnit, Mockito, Pytest, Jest, Cypress, Postman, Prometheus, Grafana
AI/ML: LangChain, Azure OpenAI, Pinecone, Hugging Face Transformers, PyTorch, Scikit-learn, spaCy, MLflow

EXPERIENCE

- Software Developer – AI

Walgreens

March 2025 – Present
United States

 - Developed Python backend services using FastAPI for a pharmacy support application handling 85,000 daily queries, implementing workflows for prescription inquiries, pharmacy searches, and customer support requests.
 - Secured backend services using OAuth 2.0, JWT, Azure Entra ID, and Azure Key Vault, enforcing role-based access and protecting sensitive pharmacy data.
 - Built a Retrieval-Augmented Generation (RAG) pipeline using LangChain, Azure OpenAI, and Pinecone, reducing average inquiry resolution time by 42% through retrieval of relevant pharmacy information.
 - Built PostgreSQL data-access and transaction workflows for high-volume application records, improving consistency across service operations.
 - Implemented Redis caching for frequently accessed pharmacy data, reducing redundant database reads and downstream API calls.
 - Wrote unit and integration tests using Pytest, covering business logic, API validation, and service failures to catch regressions before releases.
- Software Developer

IBM

June 2022 – December 2023
Chennai, India

 - Built reusable React and TypeScript components using Redux and GraphQL, standardizing state management and optimizing data-fetching patterns to reduce frontend bandwidth consumption by 40%.
 - Modernized legacy application functionality into independently deployable Java and Spring Boot microservices, using Spring Cloud Gateway for centralized routing, authentication, and request management.
 - Optimized PostgreSQL queries and added Redis caching, reducing p99 API latency by 86% across transaction workflows.
 - Developed event-driven services with Apache Kafka and Go to process asynchronous updates across distributed applications.
 - Automated Docker and Kubernetes releases through CI/CD and diagnosed production issues using logs, Prometheus, and Grafana.
- Full Stack Developer

Virtusa

January 2021 – June 2022
Chennai, India

 - Developed responsive customer-facing and administrative applications using React, TypeScript, and Redux, creating reusable UI components for shared business workflows.
 - Improved initial page-load performance by 55% through route-based code splitting, lazy loading, and Webpack bundle optimization.
 - Designed and implemented 20+ RESTful endpoints using Node.js and Express.js, integrating PostgreSQL-backed workflows for user administration, transactions, and operational reporting.
 - Established automated unit and end-to-end testing with Jest and Cypress, achieving 88% code coverage and reducing post-release defects by 45%.

PUBLICATION

“Wearable Smart Device That Can Monitor Multiple Vital Parameters.” *Journal of Population Therapeutics and Clinical Pharmacology*, 30(15), 342–349, June 2023. DOI: 10.47750/jptcp.2023.30.15.039.

CERTIFICATIONS

AWS Certified Developer – Associate | AWS Certified Cloud Practitioner | PyTorch for Deep Learning

EDUCATION

Webster University, Saint Louis, MO | M.S. Cybersecurity with Artificial Intelligence
R.M.K. Engineering College, Chennai, India | B.Tech. Computer Science and Engineering

December 2025
May 2023
